

Speciality Alloys and Advanced Materials Market

M&A activity in the UK speciality alloys and advanced materials sector is strong and expected to continue, with a focus on innovation, sustainability, and supply chain resilience. The UK market is set for significant growth and will be further enhanced by acquisitions.

> Key Highlights

Introduction

The UK speciality alloys and advanced materials market is experiencing robust growth, driven by increasing demand across sectors and a projected compound annual growth rate (CAGR) of 5.6% through 2030. Key drivers of this growth include growing demands in the aerospace, electric vehicle and renewable energy sectors.

However, the industry faces several challenges, including price fluctuations, a cautious view of the market from financial institutions, skilled worker shortages, elevated energy prices, and strict environmental and safety regulations.

Despite these challenges, this buoyant market is still attracting M&A activity. Entrepreneurs Hub recently completed a deal involving a supplier of speciality alloys to the defence, aerospace, and oil and gas sectors. See p5 for further details.
